

## Explanation of 60 Hour GPA Calculation

### GPA REQUIREMENT

Post-Baccalaureate applicants must have a 3.00 GPA on the last 60 credit hours of all college-level coursework attempted.

### GPA CALCULATION

- ✓ All courses attempted for college-level credit are used regardless of where they were taken, including repeated courses and coursework that does not count towards degree.
- ✓ The calculation includes all transfer work within the last 60 credit hours, including courses that did not transfer because of a low grade.
- ✓ Only letter grades with an assigned grade point value are used.
- ✓ The calculation begins with the most recent semester and goes back from there, until you reach 60 hours.
- ✓ If the 60th semester hour occurs in the middle of a given semester, all grades for that semester are used to determine GPA.

A	A-	B+	B	B-	C+	C	C-	D+	D	D-	F
4.00	3.67	3.33	3.00	2.67	2.33	2.00	1.67	1.33	1.00	0.67	0.0

ADD up the total number of credits - ADD up the total number of grade points - DIVIDE the total number of credits by the total number of grade points.

### TARGET GPA CALCULATION

To do a target GPA, use the original calculation and add any new credit hours with grades. You must take out the bottom row of the calculation if necessary because only the last (most recent) 60 hours are used to determine admission. See example below.

### SCENERIO FOR TARGET

Megan has a 2.70 GPA on the last 63 hours. She is taking 12 hours in spring 2013 at MT and wants to know how that will affect her GPA.

<b>ORIGINAL CALCULATION EXAMPLE</b>
---

	Semester	School	Hours
1	Fall 2012	MT	15
2	Summer 2012	MT	9
3	Spring 2012	Motlow	12
4	Fall 2011	Motlow	12
5	Spring 2011	Motlow	15
<b>Total</b>			<b>63 hour</b>

<b>TARGET CALCULATION EXAMPLE</b>
---------------------------------------

	Semester	School	Hours
1	Spring 2013	MT	12
2	Fall 2012	MT	15
3	Summer 2012	MT	9
4	Spring 2012	Motlow	12
5	Fall 2011	Motlow	12
<b>Total</b>			<b>60 hours</b>
